#### 10.0 Summary

#### 11.0 Actions

Table 11: Actions

# **Housing Delivery Test Action Plan**

# 1.0 Introduction and Background

1.1 Sandwell MBC has prepared a Housing Delivery Test (HDT) Action Plan to set out reasons for under-delivery, explore ways to reduce the risk of further under-delivery and to set out actions currently undertaken to bring sites forward.

# 2.0 Why is the HDT Action Plan being prepared?

- 2.1 The Government is committed to the improved delivery of more new homes nationally through their economic and housing growth agendas. To this end they have introduced various measures and reforms to the planning system intended to deliver more housing, improve housing affordability and remove barriers to development. Local planning authorities (LPAs) are challenged to be more proactive in increasing the speed and quantity of housing supply to meet the identified housing needs of their local area.
- 2.2 The Housing Delivery Test (HDT) has been introduced by the Government as a monitoring tool to demonstrate whether local areas are building enough homes to meet their housing need. The HDT will be used to determine if a 20% buffer will apply in housing supply assessments and also whether the presumption in favour of sustainable development should apply.
- 2.3 The consequences of failing the Test are set out in the NPPF. These consequences will apply until subsequent Test results demonstrate that delivery has recovered:
  - a) All LPAs with a Test result of less than 95% must prepare an Action Plan within six months.
  - b) All LPAs with a Test result of less than 85% must provide a 20% buffer to the Five-Year Land Supply.
  - c) The Presumption in favour of sustainable development (the Presumption) applies if the test result is less than 75%

#### 3.0 How is the HDT measured?

3.1 Full details of the method for calculating the HDT are specified within the 'Housing Delivery Test Rule Book' and Planning Practice Guidance. The data used to assess delivery are Ministry for Housing, Communities and Local Government (MHCLG) statistics for the total net housing completions in a local planning authority (LPA) area over a rolling three-year period. This

<sup>&</sup>lt;sup>1</sup> https://www.gov.uk/government/publications/housing-delivery-test-measurement-rule-book

<sup>&</sup>lt;sup>2</sup> https://www.gov.uk/guidance/housing-supply-and-delivery#housing-delivery-test

includes student accommodation and other communal accommodation, using a ratio to adjust for occupancy. The calculation compares the number of new homes delivered over the previous three years with the authority's housing requirement.<sup>3</sup>

- 3.2 Financial years are used for monitoring and test results will be published annually in November by MHCLG.
- 3.3 As the adopted housing requirement in Sandwell MBC is more than five years old (through the Core Strategy which was adopted in 2011), the council's HDT has been assessed against the household projections under the transitional arrangements as set out in the HDT Rule Book.

# 4.0 Development Plan status

# 4.1 The current adopted development plan comprises:

• The Black Country Core Strategy (2011)

This is a strategic planning document that covers the four Black Country authorities, Dudley MBC, Sandwell MBC, City of Wolverhampton Council and Walsall MBC during the period 2006 – 2026. It sets the housing requirement for the Black Country and for each authority. For Sandwell the total requirement is 21,489 net homes or 1074 per annum. It also sets an indicative phasing for the delivery of:

- o 2006-16 7421 homes
- o 2016-21 4690 homes
- o 2021-26 9378 homes

However, it does not allocate sites, but identifies broad locations for housing and employment uses.

Sandwell Site Allocations and Delivery DPD (2012)

This is the 2<sup>nd</sup> tier document that builds on the Black Country Core Strategy and provides allocations and local policies within the Borough until 2021, excluding the West Bromwich AAP area. It has a requirement for 12,257 net homes or 817 per annum.

West Bromwich AAP (2012)

This sets the vision and strategy for the future development of West Bromwich Town centre and its immediate catchment area until 2026. It has a requirement for 3508 net homes or 175 per annum.

• Smethwick AAP (2008) & Tipton AAP (2008)

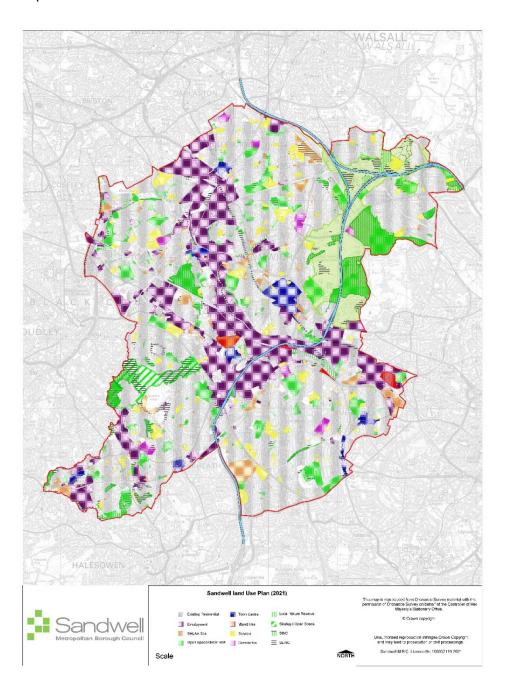

<sup>&</sup>lt;sup>3</sup> The housing requirement is either the lower of the latest adopted housing requirement or the minimum annual local housing need figure. Where the adopted housing requirement is more than five years old, the minimum annual local housing need figure will apply

Both these documents provide the vision for how the areas will be developed, however their housing requirements are encompassed in the BCCS and SAD.

#### Land Use Plan

Map 1 highlights all sites currently allocated or with planning permission for housing, employment use, public open space. It also shows schools and existing built up areas. It highlights that most of the land within Sandwell has been allocated for varying uses leaving a limited amount of surplus land. It identifies that one of the major barriers to delivering housing in the future is the shortage of a supply of suitable land and sites.

Map 1: Sandwell Land Use Plan

# 4.2 Future development plans

• Black Country Plan (BCP)

This will replace the Black Country Core Strategy. The plan will extend to 2039. Map 1 demonstrates the amount of surplus land that is available and the difficulty that the Council faces in trying to identify and allocate new sites for residential use.

The BCP will for the first time allocate sites for residential and employment uses. Work started on the review in 2016, consultation took place in 2017 and included a Call for Sites. A further Call for Sites was issued in July 2020. Consultation on the Draft Plan was carried out between August and October 2021, with adoption anticipated in 2024.

Sandwell Development Plan

This will replace the SAD and will include local policies and allocations for other uses i.e., Nature Conservations areas. The preparation of this plan closely follows the BCP with adoption anticipated in 2025.

West Bromwich AAP

This will replace the existing West Bromwich AAP and its boundary is anticipated to be smaller focussing solely on the strategic centre. The timetable for this is being developed.

In the meantime, an Interim Planning Statement (IPS) and Masterplan is being prepared for West Bromwich Town Centre.

The Interim Planning Statement for West Bromwich will help to guide development in the West Bromwich Area Action Plan (WBAAP) area until the revised AAP is adopted. The Masterplan and IPS will inform related planning decisions in the Town Centre and will also act as a precursor to the full review and adoption of the WBAAP, due post-2024.

This Statement sets out the anticipated 'direction of travel' of planning policy for West Bromwich, and the general locations and scale of development anticipated in the Masterplan. Consultation on the IPS and MP was carried out between July and August 2021. The IPS/Masterplan will be reported to Cabinet during January 2022 with final recommendations that both documents are approved/endorsed going forward.

# 4.3 The Action Plan also supports delivery of the following documents / initiatives:

Vision 2030

Action Plan supports delivery of: Ambition 7 - We now have many new homes to meet a full range of housing needs in attractive neighbourhoods and close to key transport routes

Sandwell Housing Strategy Statement 2012 – 2022

Action Plan supports the 'Housing Vision for the Future' which includes 'Encouraging the building of new homes'.

Housing Delivery Programme

Action Plan supports the delivery of new Council homes.

• Sandwell's Inclusive Economy

The Council has continued to work towards the development of an inclusive local economy, but this has obviously been curtailed to a degree by the COVID19 pandemic. Despite this, activities supporting the aims and objectives of the Inclusive Economy initiative have continued, such as on climate change. Work is also continuing at a higher level with the Inclusive Economy Board

Development Ready

The Council is already doing some great work to facilitate development through Development Ready <a href="http://www.sandwell.gov.uk/info/200186/regenerating\_sandwell/2437/sites">http://www.sandwell.gov.uk/info/200186/regenerating\_sandwell/2437/sites</a>

Intervention Areas

There are three main focus areas for regeneration within Sandwell. In the north of the borough a joint venture agreement with West Midlands Combined Authority and Sandwell Council aims to prepare a masterplan for the former sewage works at Friar Park together with the adjacent council owned land. Following the preparation of a masterplan, the land will be remediated in order to bring forward a family orientated high quality residential led mixed-use development of up to 630 new homes and associated facilities.

A masterplan for an Interim Planning Statement for West Bromwich has been prepared for the strategic town centre sites. It identifies potential diversification of uses, introducing more town centre living alongside other mixed-use development to address the contraction of retail requirement and re-purposing sites for alternative higher density residential options, leisure and educational facilities.

The council is working collaboratively with Birmingham City Council, West Midlands Combined Authority, Homes England, Canal & River Trust and Sandwell and West Birmingham Hospitals Trust to prepare an Area Wide Framework covering the regeneration corridor from Smethwick High Street in Sandwell to City Hospital in Birmingham. Consultants were commissioned to undertake the cross-boundary Area Framework which will also involve more detailed master planning at Grove Lane to compliment the current regeneration taking place on the new Midland Metropolitan University Hospital, due to open in Summer 2022. The regeneration proposals will look at delivering up to 800 new homes, a primary school and associated infrastructure.

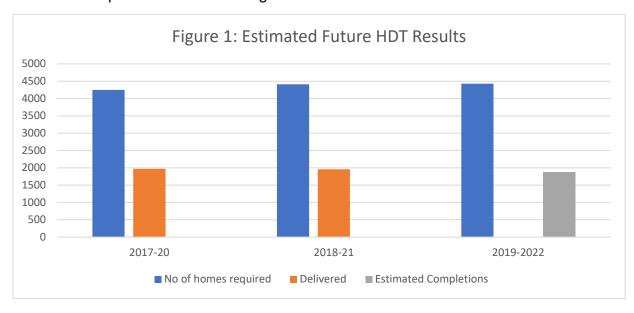

# 5.0 How did Sandwell perform against the HDT?

5.1 In February 2019 the Government first published the 2019 HDT results<sup>4</sup> and are updated annually:

Table 1: HDT Results

| Year | Number of homes required | Number of homes delivered | Housing Delivery<br>Test: 2019<br>measurement | Housing Delivery Test: 2019 consequence              |
|------|--------------------------|---------------------------|---|--|
| 2019 | 3509                     | 2137                      | 61%   | Action plan;<br>20% buffer;                          |
| 2020 | 4118                     | 2423                      | 59%   | Action plan;<br>20% buffer;<br>Presumption in favour |
| 2021 | 4123                     | 2007                      | 49%   | Action plan;<br>20% buffer;<br>Presumption in favour |

- 5.3 The results show that the Council is required to produce an Action Plan, add a 20% buffer onto the Five-Year Land Supply and the Presumption in Favour applies.
- 5.4 Based on completions that have already happened and using the estimated number of units to be delivered in 2021/22 and an estimation of the number of homes required (these figures can change due to applying the affordability factor) the chart below shows that it is anticipated that Sandwell will have a measurement for 2022 42%. Based upon these estimations, a buffer and action plan will be needed again in 2022.

<sup>&</sup>lt;sup>4</sup> https://www.gov.uk/government/publications/housing-delivery-test-2019-measurement

# 6.0 Current Housing Supply and Delivery Rates

# 6.1 Local Context

- Table 2 shows housing completions in Sandwell between 2006 and 2021 against the adopted Black Country Core Strategy.
- 6.3 Completions dropped off around 2008/9 onwards due to the impact of the global financial crisis on development activity. Completions to date show that they fell just short of the total phased target. It is clear from Table 3 that this delivery was helped by the large number of completions between 2006-2008. The red cells highlight where the delivery rates fell below that of the indicative phased target.

Table 2: Housing Completions in Sandwell between 2006-2021 compared with the Black Country Core Strategy Phased Requirement

| Year      | Sandwell<br>Gross<br>Completions | Sandwell Demolitions and losses of residential units | Sandwell<br>Net<br>Completions | Black Country Core Strategy<br>Indicative Phased Plan<br>Target (2011) | Annualised<br>Target |
|-----------|----------------------------------|--|--------------------------------|--|----------------------|
| 2006/2007 | 1514                             | 352  | 1162                           | 742  | 1074                 |
| 2007/2008 | 1401                             | 265  | 1136                           | 742  | 1074                 |
| 2008/2009 | 676                              | 226  | 450                            | 742  | 1074                 |
| 2009/2010 | 596                              | 91   | 505                            | 742  | 1074                 |
| 2010/2011 | 662                              | 113  | 549                            | 742  | 1074                 |
| 2011/2012 | 771                              | 172  | 599                            | 742  | 1074                 |
| 2012/2013 | 736                              | 24   | 712                            | 742  | 1074                 |
| 2013/2014 | 564                              | 28   | 536                            | 742  | 1074                 |
| 2014/2015 | 970                              | 9  | 961                            | 742  | 1074                 |
| 2015/2016 | 575                              | 14   | 561                            | 742  | 1074                 |
| 2016/2017 | 917                              | 16   | 901                            | 938  | 1074                 |
| 2017/2018 | 692                              | 16   | 676                            | 938  | 1074                 |
| 2018/2019 | 822                              | 28   | 794                            | 938  | 1074                 |
| 2019/2020 | 501                              | 0  | 501                            | 938  | 1074                 |
| 2020/2021 | 660                              | 6  | 654                            | 938  | 1074                 |
| Total     | 12057                            | 1360   | 10694                          | 12,110   | 16,110               |
| Shortfall |                                  |  |                                | 1,416  | 5,416                |

- 6.4 Table 3 sets out current supply by type of land, its brownfield or greenfield character and the status of the site, whether it is allocated in the plan or if it has planning permission.
- 6.5 The high percentage of sites that are brownfield land reflects the strategy in the BCCS for 92% of sites to be brownfield.

Table 3: Current supply by previous use

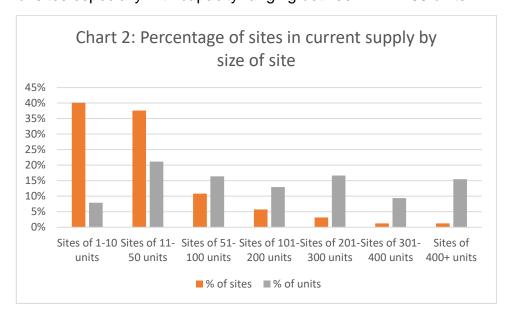

|                           | Previously PDL |                | _              | Previously Greenfield<br>Land |                | Total          |  |
|---------------------------|----------------|----------------|----------------|-------------------------------|----------------|----------------|--|
|                           | No of<br>Sites | No of<br>Units | No of<br>Sites | No of<br>Units                | No of<br>Sites | No of<br>Units |  |
| Allocated Sites           | 44             | 3689           | 0              | 0                             | 44             | 3689           |  |
| Sites with PP             | 266            | 2919           | 3              | 60                            | 269            | 2979           |  |
| Other identified capacity | 5              | 442            | 2              | 580                           | 7              | 1022           |  |
| Total                     | 315            | 7,050          | 5              | 640                           | 320            | 7690           |  |
| %                         |                | 92%            |                | 8%                            |                |                |  |

Table 4 sets out the supply of sites by size of site. It shows that there is a 'spread' of site sizes which should allow for a variety of developers to be involved in the delivery of homes, i.e. SMEs, volume housebuilders and housing associations.

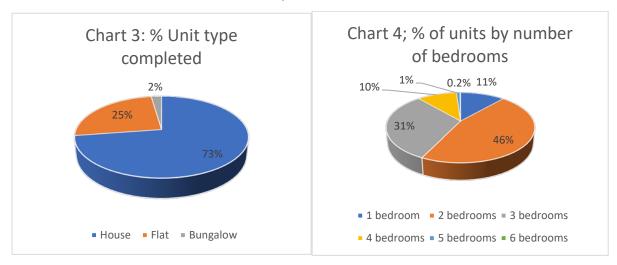

Table 4: Current supply by size of site

|                                      | Sites of 1-10 sunits |                   |                |                   |                | Sites of 51-<br>100 units Sites of 101-200 units |                   | Sites of<br>201-300<br>units |                   | Sites of<br>301-400<br>units |                   | Sites of<br>400+ units |                   |                   |                         |                         |

| %                                    | 40%                  | 8%                | 38%            | 21%               | 11%            | 16%  | 6%                | 13%                          | 3%                | 17%                          | 1%                | 9%                     | 1%                | 15%               |                         |                         |

6.7 Chart 2 shows that Sandwell has many small sites. However, they provide for less than 10% of the homes. It also demonstrates that there is a mix of sizes of sites especially with capacity ranging between 11 – 200 units.

6.8 Charts 3 and 4 show a good mix of sizes with two thirds of new homes completed last year being houses / bungalows, however there was a range in the number of bedrooms built with two bed homes making up for nearly half of all completions. These results also reflect the current market and the decline in the demand for flatted developments.

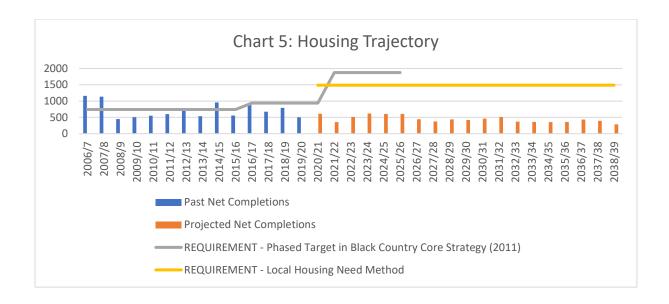

6.9 Table 5 and Chart 5 sets out the completions that have occurred up to 2021. It also estimates what the supply will be up to 2039. The supply figures are taken from the Strategic Housing Land Availability Assessment (SHLAA) 2020, which identifies sites that are suitable, available and deliverable for housing up to 2026 in line with the plan period in the BCCS. In reviewing the BCP, the Council is seeking to identify land to meet the need up to 2039, therefore small windfall rates have been identified for the period 2026 – 2039.

6.10 The supply figures can then be compared to the requirement as set out in the current BCCS up to 2026 and the Local Housing Need methodology to 2039. It demonstrates that to meet the target in the BCCS the net completions will have be more than double the completions delivered annually in the past 10 years.

Table 5: Past and projected completions based upon the target in the Black Country Core Strategy

| Year    | Past Net<br>Completions | Projected Net<br>Completions | REQUIREMENT - Phased Target in Black Country Core Strategy (2011) | REQUIREMENT - Local<br>Housing Need Method |
|---------|-------------------------|------------------------------|---|--|

| 2029/30 |                         | 417                          |   | 1488                                       |
| 2030/31 |                         | 463                          |   | 1488                                       |
| 2031/32 |                         | 508                          |   | 1488                                       |
| 2032/33 |                         | 371                          |   | 1488                                       |
| 2033/34 |                         | 358                          |   | 1488                                       |
| 2034/35 |                         | 355                          |   | 1488                                       |
| 2035/36 |                         | 361                          |   | 1488                                       |
| 2036/37 |                         | 434                          |   | 1488                                       |
| 2037/38 |                         | 392                          |   | 1488                                       |
| 2038/39 |                         | 287                          |   | 1488                                       |

# 7.0 Planning Applications / S106

- 7.1 The Government sets targets for how many applications should be determined in specific time periods. They are 60% of major applications to be determined in 13 weeks, 70% of minor applications to be determined in 8 weeks and 80% of other applications to be determined in 8 weeks
- 7.2 The Planning service has consistently continued to exceed these performance targets throughout 2020, as shown below. The on-going commitment of all staff, coupled with the assistance of Planning Committee, has very much helped to achieve this.

In 2020 Sandwell Council's performance was;

- 29 major applications were received with 28 determined in 13 weeks, 97%;
- 222 minor applications were received with 196 determined in 8 weeks, 88%; and
- 702 other applications were received with 624 determined in 8 weeks, 89%
- 7.3 Table 6 sets out how many applications and the percentage approved and refused in 2020. The main reasons for refusal of residential developments were sub-standard living accommodation, poor environment, poor design and lack of parking.

Table 6: Applications received and determined

|                                   | 2020      |
|-----------------------------------|-----------|
| Number of applications received   | 1067      |
| Number of applications determined | 953       |
| Of the applications determined    |           |
| Applications approved             | 898 (94%) |
| Applications refused              | 55 (6%)   |

7.4 To help speed up the application process developers are also advised to submit viability reports and draft heads of terms etc upfront when the application comes in.

# 8.0 Viability

- 8.1 CIL was implemented in 2015, since then the Council have commissioned regular Market Reports to assess whether the CIL charge is at the right level and still viable for development typologies to deliver.
- 8.2 Currently only residential, retail and A Class uses (in West Bromwich Strategic Centre) are chargeable. The market reports looked at all typologies, including leisure and industrial to see if their viability had changed sufficiently to be chargeable in the future. It also assessed whether viability has changed on the developments that are currently chargeable.

Table 7: Summary of Property Market Report

| Year of Report | Key findings in relation to housing viability                      |
|----------------|--|
| 2016 Property  | Continues to be a significant challenge to viability across the    |
| Market Report  | borough for most development typologies. Build costs rose          |
|                | 16.5% with average house prices increasing by 15%.                 |
| 2017 Property  | Continues to be a significant challenge to viability across the    |
| Market Report  | borough for most development typologies. Build costs rose by       |
|                | 11% with average house prices increasing by 3%. Indicates          |
|                | viability has decreased since the last study.                      |
| 2019 Property  | Residential sales values and development land values have          |
| Market Report  | shown signs of improvement however construction costs have         |
|                | also risen in cost and for many development schemes will have      |
|                | increased at a faster rate than sales and land values have.        |
| 2020 Property  | Due to limited transaction levels because of Covid-19, it is       |
| Market Report  | inconclusive as to whether residential sales values, rents and     |
|                | development land values have shown signs of improvement            |
|                | since the March 2020 Sandwell Property Market Report.              |
|                | However, the Commercial Market is a mixed picture, with            |
|                | improvements in the Industrial market, a decrease in demand in     |
|                | the office markets and significant problems for the retail market. |
|                | Construction costs appear to have remained at a fairly similar     |
|                | level to the last report with a projected drop in cost.            |

8.3 The above summaries from the three individual reports demonstrate that viability in the borough is an issue which has an impact on sites coming forward for development. However, they also confirmed that the CIL charge was still correct and viable for the development typologies on the charging schedule.

### 9.0 Strategic Sites

- 9.1 The SHLAA sets out that there are 320 sites that are allocated, with permission or that are suitable for residential development which could realise around 7690 homes (gross). The following table looks at the strategic sites (sites of 100 units or more) the capacity of these sites is 4192 which equates to 55% of the remaining supply to meet the BCCS target to 2026. Since the previous HDT AP, Table 8 highlights the issues and challenges facing the strategic sites, what actions have been taken to date and what further action is needed.
- 9.2 A review of Black Country Core Strategy and the Site Allocations and Delivery DPD began in 2017. The review assessed all residential and employment allocations to determine whether they are still developable, deliverable and available. In the early stages of the reviews, information came forward for certain sites which meant they are were no longer considered to be developable due to the current occupiers investing significantly in their sites to expand their businesses. Therefore, even though they are allocated for residential purposes, there is no longer any prospect of them coming forward for residential use.
- 9.3 During 2019 and 2020, further detailed evidence has been progressed to support the Black Country Plan review in the form of the Black Country EDNA Stage 2 and the Black Country Employment Area Review (BEAR). This work provides a comprehensive review of the quality and long term sustainability of the Black Country's employment areas for continued employment use and the extent to which occupied employment sites currently allocated for housing should continue to be allocated for redevelopment.
- 9.4 The overall effect of the EDNA and BEARs work is to recommend that the homes which are currently allocated in Sandwell on occupied employment land should be reduced by some 7290 homes. This new evidence has immediate implications for the suitability and developability of specific housing allocation sites. National planning guidance expects all available evidence to be taken into account when determining the list of sites suitable and developable for housing through the SHLAA process. This reduction was reflected in the 2020 SHLAA, with a detailed justification taken from the BEAR work provided for each site as part of the deliverability commentary.

Table 8 focusses on strategic sites, however there are a range of sites within the remaining supply identified in the SHLAA that are not strategic (have a capacity of less than 100 units). These sites experience similar issues that have resulted in them not being developed, namely ground conditions and the cost of remediating the land and relocation of existing businesses.

9.3 The Council have been involved in applying for funds to aid remediation; knowledge of ground conditions and seeking funds for viability gaps to help relocate existing businesses, to reduce the risk to developers. Table 11 sets out where funds have been sought and whether successful.

# 10.0 Summary

- 10.1 The main barriers to creating and maintaining a robust supply of housing land in Sandwell are a lack of suitable vacant and surplus land, ground conditions and the lack of funds to assist with site assembly, relocation of existing business and for remediation of land.
- 10.2 Given the increase in demand for employment land and sites, which was not anticipated when the last strategic planning assessments were carried out for both the Black Country in general and Sandwell in particular, the supply of brownfield land that might otherwise have come forward to meet local and wider housing needs has not materialised. This reflects the health of the local economy and is in many ways to be welcomed. The Council is actively seeking to both meet and exceed its housing targets, both through examining more closely the availability of locally derived opportunity sites in local town centres across the district and also through its partnership with the other Black Country authorities in establishing and working towards more strategic allocations across the HMA.
